FIRE PROTECTION.

The question of fire protection has again been revived by our citizens and town fathers and it is one that requires immediate and serious attention. The engine now on hand would be inadequate to combat a large fire, even if the town had a well organized and efficient fire brigade. But we have not; we have practically nothing. Wetaskiwin is now a large commercial centre with massive buildings that are all filled to overflowing with immovable goods to meet the demands of the ever increasing trade. With one exception these structures are all frame, and easily ignited, and should a fire get started under present conditions nothing but prompt action could possibly save the business portion of our flourishing town and it would be a pitiful sight to see thousands of dollars go up in smoke in a few short hours with the citizens powerless to check it. We have lost control of the situation, and if it had not been for the prompt action in securing a few of the Victor fire extinguishers and having them "play" on the flames, we would see this have led to a chronic and a disastrous conflagration. Too much cannot be said in the praise of the Victor just at the commencement of a fire, but the little fire get a good start it would be beyond the power of the little Victor to extinguish it. The day is coming when a fire will break out. Let us be ready when it does come.

Naturally, the question of finance arises. In the first place the present engine can be returned to the Wetaskiwin Engine Co. at a discount of 10 per cent. on purchase price. It would probably take \$5,000 to install an up-to-date engine, with hook and ladder trucks, etc., but the sum could easily be secured in the east on debentures extending over a period of ten years at a small percentage. As soon as the engine is installed the rate of fire insurance would be materially reduced. Supposing at present there is \$150,000 insurance carried in town at an average rate of 4.50, which at low cost would be reduced to 3.50, it would be a saving of \$675 a year. This saving in itself would easily wipe out the debentures in ten years, and the town would be several hundred dollars ahead by the change, to say nothing about the protection to property in the meantime.

Let the town fathers act as well as talk; the people want better fire protection.

A Pretty Wedding

Referring to the nuptials of two popular and highly esteemed young people of this town, the Peterborough Examiner publishes the following: "A very pleasing event took place last evening at the residence of Mrs. David Hunter, in Cavan, when his fourth daughter, Miss Martha L. Hunter, was united in marriage to Mr. Geo. D. Wallace of Wetaskiwin, N. W. The ceremony was performed by Rev. William Johnson, of Milbrook, in the presence of a large number of guests, many of whom were from Bobcaygeon, Lindsay, Milbrook, and Peterborough. The bride was handsomely costumed in white silk, with a full train and long veil. The bride was escorted by her brother, Mr. J. A. Hunter. Miss Nellie Swain presided at the organ and played the wedding march. The house was beautifully decorated with cut flowers and potted plants. The bride was exceptionally fortunate in the magnificent array of presents which she received. The gift of the groom was a superb set of pearls. After a sumptuous wedding dinner had been served, Mr. and Mrs. Wallace left to board the train at Cavanville, followed by the good wishes of a host of friends.

The attention of the C.P.R. authorities should be drawn to the insufficiency of the shipping facilities at this point. The stock cars are altogether too small. They should at least be double the size and contain many more apartments. Great difficulty is now experienced when large shipments are made as the various bunches must necessarily be run together. This is a source of great trouble to say nothing of the time lost in loading. Wetaskiwin has developed into a large commercial centre, being the nearest point of the best harvesting and farming districts in the west and certainly deserves better accommodation than is at present afforded. This matter should be taken up without delay.

Additional Town Topics

W. H. Patterson, of Milwaukee, has purchased W.A. Montgomery's farm at Bittern Lake.

Whip Sharpe, recently severed his connection with John West's Pioneer store, has accepted a situation with Compton & Montgomery.

Due to some misunderstanding, the boxing match between A. Cole of Ponoka and Frank Tate of Wetaskiwin, did not come off last Wednesday evening.

W. H. Patterson, who has been laid up for a few days the result of an accident in which he injured his hip is able to be around again, with the aid of crutches.

Mrs. W. A. Montgomery and two children now of Bittern Lake, left on Monday's train on a trip to her home in England. She will be absent for several months.

Theo. Haas, has just finished digging three deep wells in the Stone Creek settlement. They are—Nels Norden, 200 feet, Albert Lyving 205 feet, and Eric Lyving 305 feet. A good flow of water is the result in each case.

R. B. Price, who has been an efficient and popular dry goods dealer in A. R. H. Hays' store for several years, resigned his position last Saturday evening. His position is being taken by W. P. Rogers, a brother of Mrs. Jos. Giles.

J. E. Fowler, of the firm of Fowler & Co., left for Winnipeg on Monday morning to straighten up his business before moving his wife and family to town, and will likely be absent about three weeks. Mrs. Fowler will receive a most cordial welcome here.

Prof. Tyndall Richardson, a musical entertainer, will be in the hall next Monday evening Oct. 13. The entertainment consists of conjuring, slight-of-hand tricks, and the Professor comes highly recommended, having appeared before some of the royalty of England.

During the past couple of weeks we have not received as many newspaper correspondents as we had hoped for. It might be that our correspondents are a busy with harvest, but it is a pity that we cannot write a short budget we cordially request that they be heard from as often as possible. We want the news.

Another train of 19 cars of cattle was shipped from here Tuesday morning by P. Burns & Co. This shipment was made up from the herds of Messrs. Rossenrath, Slaughter, A. Carruthers, Mallett, and V. A. Vannier and some of the finest animals that ever left the district were included. Mr. Rossenrath sold 52 head which averaged 1,334 lbs.

D. H. Kirk, who recently opened up a jewelry shop in town, last week sold out to E. H. Hall, son of Dr. Hall, who started business about the same time. Possession was taken Monday evening. We are glad to learn that Mr. Kirk will not leave town, as he has secured the agency for The People's Life Insurance Company and takes this district as his field, residing here.

The C.P.R. has decided that a daily passenger and express train is what the traffic on the C & E line now requires and the mixed service was discontinued last week. Daily freight trains run on schedule time. The passenger train will leave Strathcona for Calgary at 5:30 every morning except Sunday and arrive at their destination every evening except Sunday at 5 o'clock. This is a step in the right direction.

J. A. O'Neill Hayes is now the proud owner of the May's very medal which he won last August Day in the Gun Club Shoot. The medal is of 10k gold and is about the size of a Canadian penny. The reverse side is beautifully engraved by Mr. Mayberry and contains the words "50 Best shot for Mayberry Trophy; September 1st 1902; won by J. A. O'Neill Hayes; while the reverse side has the cross grain and the clay and live pigeons. Mr. Hayes secured a total of three birds. The medal is a handsome souvenir and Mr. Hayes will well prize it of the glory that he won for himself on Sept. 1st.

Wetaskiwin Town Council.

The council met in the Odd Fellows hall on Wednesday evening, Oct. 1st, Mayor Dickson in the chair. Minutes of previous meeting read and approved.

A petition was received from Messrs. McCullum & Wallace and E. Curtis, asking for the erection of a sidewalk on the east side of lots 16 and 1, block 6.

The petition was referred to the Committee on Public Works.

Petition received from about forty ratepayers, asking for more efficient fire protection.

The petition was referred to the Fire, Water and Light Committee.

The Committee on Public Works recommended that the sidewalk in front of lots 1 to 10, block 2, Railway St., be built.

West-Talbot—That the report of the committee be concurred in.—Carried.

McKay—Finch—That the following accounts be passed for payment:—
S. Bethel.....\$ 19 00
Paulson & Balchman..... 2 10
E. T. Jacobson..... 2 05
G. H. Robinson..... 2 00
James Lapointe..... 11 12
Louis Rossenrath..... 5 60
Alex. Wagner..... 6 00
O. Braglin..... 3 00
C. O. Johnson..... 20 00
Theo. Haas..... 10 00
S. Bethel..... 64 00
Mrs. S. Bethel..... 5 78
A. W. Anderson..... 6 24
J. Curtis..... 7 35
Marion Hays..... 11 25
J. R. Wilcox..... 45 32

A. S. Rossenrath..... 3 00
R. C. Ward..... 12 00
J. H. Walker..... 42 50
J. S. Robinson..... 30 60

The Committee on Fire, Water and Light recommended that the petition for more efficient fire protection be received and that the council take into consideration the best means of providing an efficient fire engine and water supply.

West-Talbot—That a special meeting be held on Thursday at 8 p.m. to take into consideration the establishment of fire protection.—Carried.

The by-law for the prevention of disease, revised the first, second and third reading and was passed.

Council adjourned.

SPECIAL MEETING.

The following are the minutes of the special meeting held on Thursday, Oct. 2nd. The following committee were present: West, McEachern, Talbot and McKay.

McEachern—Talbot—That such members of the town council as wish to go, visit the town of Strathcona to examine the water tanks and look into the working of the fire apparatus. Carried.

Council adjourned.

A. S. ROSENKRANTZ, Clerk.

Communication.

We do not necessarily endorse the sentiments expressed here, but any correspondent under this heading.

To the Editor of The Times:—
Sir:—The item at the Criterion Hotel on Monday night last should have awakened every citizen of the town to the importance of adequate fire protection, and I think it is high time the council was taking steps to provide such protection. This is a young, vigorous, growing town, and there is no time like the present to put in a system of waterworks, the expense from which would pay the interest on the capital outlay. The cost of an up-to-date system for a town of this would not be excessive, especially as we have a range of hills almost in town, on which to build a reservoir, thus giving sufficient pressure to force a stream over the hills and into the town.

A goodly engine, as proposed, is an urgent, but, until we have a reservoir, it will not do us much good. A good engine in connection, all of which will amount to nothing, and at the best this would be only a temporary expedient. Sound a preliminary alarm, and let the council of waterworks be made to put it in, and I would ask the citizens of the town to support the present. The first expense is not great, and, as the town grows, a further addition to the fund can be made as needed, and not prove burdensome to anyone. This system would provide an adequate fire protection, the need of which is constant, and a public safety.

town as well. Everyone recognizes the fact that the present supply of water for domestic purposes is very insecure, and that, in the event of a fire, it cannot be relied on to prove a trustworthy source to the town in the near future. After an epidemic of typhoid or other disease wipes out some of the best of our citizens or their families the need of pure water will be forcibly brought home to all. But then the cry will be "too late, too late." I would therefore ask every citizen to do all in his power to push on the scheme for pure water and adequate fire protection.—PRACTICAL.

Church Chimes.

Three new members were admitted into the Swedish Presbyterian church last Sunday.

Miss Anna Saterlund, from Japan, will preach in the Presbyterian church next Sunday at 3:30 o'clock. All Swedes are cordially invited to attend.

Rev. J. Kennedy conducted the service in the Methodist church last Sunday morning and delivered a thoughtful sermon, which was directed more especially to young men. He also sang a solo in good voice which was very helpful to the hearers. Rev. Mr. Gross occupied the pulpit in the evening and gave a very inspiring address.

Rev. J. A. Claxton, from Ontario, preached in the Presbyterian church last Sunday, both morning and evening, and delivered excellent sermons. Mr. Claxton will be the minister here in the future and as he comes well recommended from Ontario he should do good work here. He has preached in the Calgary district as a student and consequently is in touch with western customs.

Reserve.

Mr. Chandler has a bad cold and it has almost laid him up.

Rev. O. German will hold communion services at his church on Oct. 19th.

Our Indian people are all through cutting grain and most of them will finish stacking this week. We hope they will do a lot of fall plowing as their teams are in good shape and they have plenty of good feed now.

Rev. John McDougall, chairman of the missions, and Rev. C. E. Somers, principal of Red Deer Indian Industrial school, paid us a visit, coming on Saturday morning on a freight train, the caboose and one or two cars broke away from the main train and as the train returned slowly to connect again the coming together was so severe, as they were going down grade, that Mr. McDougall was thrown from his seat and received a severe bruise on the leg. He was quite lame when here, but he continued his trip. We hope they will be soon fully recovered again.

Program of Races.

The Wetaskiwin Sports Committee have arranged for the following program of races to be run off at Wetaskiwin on October 14th:

50 Yards Race—Purse \$75. Trot or Pace. Mile heats, 3 in 3. Pioneer Pete, May Hill, May McNamee, Bill Cowan, and any other horses the committee may deem eligible.
FARMERS' HENSING. 100 Yards Race—Purse \$75. 2 in 3.
FARMERS' TROTTER RACE—Purse \$75. 2 in 3.
OPEN HENSING RACE—Purse \$75. Mile heats, 2 in 3.
TROT RACE—Purse \$100. Half mile heats, 2 in 3.
RED RIVER CART RACE—Purse \$100. Half mile heats, 2 in 3.
Half mile heats to be driven by squaws.

Successful Experiments in Cool-Curing of Summer Cheese

Department of Agriculture, Ottawa, September.—Thanks to the ever careful enterprise of the Dominion Department of Agriculture, under the Hon. Sydney Fisher, Canada has begun to produce summer cheese of a quality to meet successfully the most exacting requirements of the markets of the United Kingdom and elsewhere. The modification in the methods of making and curing will enable the farmers to obtain about one pound additional of cheese from every hundred pounds of milk. That represents nearly ten per cent. in increase of quantity. Moreover, the cheese cured in the new way will command in coming years from one to two cents per pound higher price. On the average that will amount to from ten to fifteen per cent. increase in value per pound.

That the United Kingdom appreciates Canadian cheese is proved by the fact that while in 1871 15,171,372 worth, and in 1891 85,141,373 last year Canada's cheese bill to the motherland amounted to \$29,636,551, or over \$12,000,000 more than fifty years ago, and more than double that of ten years ago. In 1901 Great Britain imported a total of 288,731, 120 pounds, valued at \$20,096,951, or more than two-thirds of the total imports.

Hitherto the supply from Canada, having the finest quality, has been of September cheese. There was a good demand for the summer output, but the curing of it at the high temperature of July and August weather gave it a fatal flavor which was disliked. In samples tested from over thirty factories the cool-cured June and July cheese has been found to possess the fine mild flavor and rich body characteristic of the September cheese, while the July cheese cured in the ordinary manner is nearly every instance was strong in flavor and rough in texture. The value of the June and July cheese of cheese from the cool curing rooms as compared with Professor Robertson was fifty per cent per pound higher than the matured cheese in the ordinary way. When this way of curing cheese in

cool rooms during summer becomes general the depressing effects of stocks of heated cheese on the market will be prevented. It is expected that the finer quality of the summer cheese will increase the consumption so much that are another decade close Canada will be exporting fully forty million dollars worth of cheese per annum, realizing all-around the top market price obtainable for this branch of her dairy produce.

In the Government illustration curing rooms, of which there are four, a thin coating of wax is put on each cheese. Thereby the surface is protected from mould; and shrinkage has been much less than formerly. In one test case the shrinkage of an unwaxed cheese in the ordinary room during one month amounted to two pounds four ounces, whereas the shrinkage of an unwaxed cheese in the Government cool-curing room amounted to one pound twelve ounces, and the shrinkage on a similar cheese which had been coated with wax and put in the Government cool-curing room was only eight ounces.

Many of the leading exporters of cheese have examined the cheese cured in the Government cool-curing room. All testify to the great improvement in quality. The following brief reports are from the Woodstock station. The results at the others are similar.

Mr. Thomas Ballantyne, of Stratford, said he had examined the cheese at the cool-curing room. The difference between the cheese cured in the cool room and the others was most astonishing. He agreed with what Professor Robertson said, and hoped such improvements would be made that all cheese would be cured without being heated.

Mr. R. W. Steinloff said he also had examined the cheese. He endorsed the opinions of others as to the marked superiority of the cool-cured cheese. In the July's he put the difference at fully one and a half cents per pound.

Mr. R. A. Simister believed the object lesson in the proper curing of cheese at a low temperature, in branding, and in handling the cheese has been the greatest advance he has known in the cheese trade for twenty years, and he also said the Department of Agriculture deserved the greatest possible credit for what it had done.

In order that every dairyman may be fully educated up to this latest phase in dairying improvements, the Department of Agriculture at Ottawa will publish during the fall and winter months full information regarding the methods to be followed in improving curing rooms at all cheese factories. This will be prepared under the supervision of Mr. J. A. Buddick, Chief of the Dairy Division, who had the direct oversight of the Government illustration curing rooms during the past summer.

Oiler, Hammond and Nanton have sold 501,400 acres land since last January for \$1,816,000. This does not include a big sale to the Saskatchewan Land Company.

J. W. PITMAN,
Manager for Geo. Lane

A few words To Farmers!

The most reliable Horse and Cattle Medicines are
those prepared by men who have by long experience proved
the value of the remedies they recommend.

Advice is cheap—it costs nothing and is often of no
value.

Sensible people don't try experiments on their live
stock, but take the advice of those who have gained know-
ledge by long study and have proved the efficacy of the
remedies they prescribe.

In purchasing medicines there are three essentials
not to be overlooked:

Purity of the drugs.
Suitability for the purpose.
Careful preparation.

I handle pure drugs only, and keep in stock a full
line of Horse and Cattle Medicines. Note the following:—

Ransom's Kurit.
The only reliable remedy for Sores, Wounds, Barb Wire Cuts, Saddle
Galls, Burns, Cracked Heels, Collar Sores, Scratches, Grease, Etc. It cures
all sores. It does not blister. It acts like a charm.

Price, 50 Cents.

Cordial Condition Powder for Horses.

Are strongly recommended for producing a beautiful, smooth skin, and
for bringing Horses into general good condition; they give tone to the stom-
ach, increase the appetite, and purify the blood from all gross and impure
humors; they will be found of essential service for greases, swollen legs, coughs,
and influenza.

50 Cents per Box.

Dr. Ransom's Worm Killer, for Worms in Horses.

The best, quickest, and most certain cure for worms in horses. It acts
directly on the worms, destroying and expelling them; gives tone to the stom-
ach, increases the appetite, and purifies the blood from all gross and impure
humors; they will be found of essential service for greases, swollen legs, coughs,
and influenza.

Price, 50 Cents per Box.

Walker's English Horse Liniment or White Oils for Horses and Cattle.

For Sprains, Cuts, Over-reaches, Chapped Heels, Wind Galls, Cuts,
Wounds, Bruises, Sore Throat, Influenza, Sore Back or Shoulders, Chapped
Hoofs, Rheumatism, Etc., Etc.

50 Cents per Bottle.

Miquelon's Celebrated Fever Powder

For Horses is the most reliable remedy for the prevailing horse sick-
ness from which so many animals have died during the past two years.

Price, \$1.50 per Pound.

J. H. Walkre, M.P.S.

English Chemist and Druggist, Wetaskiwin.
